NATIONAL REF.: 164496623

TITLE : Sanitary appliances - Washbasins for wall brackets -  
Distance of brackets

TITLE AMPLIF.: This standard differs in that it covers many different  
brackets of washbasins. There are some variations in  
the bracket mounting position in this standard have put  
together for the common sizes. The standard must  
facilitate, for example, plumbers can install brackets  
according to the most common sizes and know that to all  
wash basins manufacturer specifies can be mounted on  
brackets

NATIONAL REF.: 164496341

TITLE : Assessment of fire safety of buildings - Initial  
assessment of fire safety of buildings

TITLE AMPLIF.: NPR 6059 is a tool in order to inspect existing  
building uniformly. Benchmarking of buildings on the  
aspect of fire safety is possible. All fixed fire  
safety measures (e.g. fire compartment, sprinkler  
systems etc.) in a building are included in the fire  
safety scan. The fire safety scan is done in one day.  
The fire safety scan is limited to a visual check of  
the building and a check of all documents which prove  
the fire safety of the building. Calculations are not  
part of the first safety scan.

information  
TITLE AMPLIF.: The property book is based on the structure of the  
ÖNORM B 1801 and ÖNORM A 7010 and is a common  
coordinated information structure for all objects after  
new construction or new version of data. The property  
book contains use and operation-oriented metadata,  
tables, plans, notices, instructions, contracts, cost  
systems and strategic information.

NATIONAL REF.: 164496604

TITLE : Photocatalysis - Determination of photocatalytic  
activity by the tangential continuous flow method -  
Nitric Oxide abatement

TITLE AMPLIF.: This standard describes the method of determining the  
ability of inorganic materials dispersed either in  
cementitious mortars - and/or lime -, ceramic matrices,  
paints or deposited as thin films or coverings onto  
different substrates to remove Nitrogen Monoxide NO  
from a gas stream by photocatalytic action. The  
photocatalytic NO abatement ability of the materials  
investigated is assessed by measuring the degradation  
rate. The degradation rate as measured allows  
determining the photocatalytic abatement rate under  
test conditions, subtracting the effects induced by  
mass transfer limitations. The degradation rate is a  
peculiar property of the material under test.

NATIONAL REF.: 164496559  
TITLE : Road traffic and transport telematic - Automatic  
dynamic debiting systems and automatic access control  
systems using dedicated short-range communication at  
5,8 GHz - Part 1: Physical Layer  
TITLE AMPLIF.: The standards UNI 10607-1, UNI 10607-2, UNI 10607-3 and  
UNI 10607-4 form together a three-layered architecture  
for DSRC as used for EFC. This part of UNI 10607:-  
specifies a physical layer at 5,8 GHz,- provides  
requirements for the communication medium to be used  
for exchange of information between RSUs and OBUs,-  
sets foundations for the integration of protocol stacks  
based on this standard using the same formalisms as in  
UNI EN 12253:2005.

NATIONAL REF.: 164496589  
TITLE : Road traffic and transport telematics - Automatic  
dynamic debiting systems and automatic access control  
systems using dedicated short-range communication at  
5,8 GHz - Part 2: Data Link Layer  
TITLE AMPLIF.: The standards UNI 10607-1, UNI 10607-2, UNI 10607-3 and  
UNI 10607-4 form together a three-layered architecture  
for DSRC as used for EFC. This part of UNI 10607:-  
defines the Data Link Layer,- is positioned with  
respect to other related standards by the layers  
defined in OSI Basic Reference Model [ISO/IEC 7498-1]  
as adopted for EFC,- supports broadcast and half-duplex  
transmission modes,- takes into account that the mobile  
equipment communicates with the fixed equipment while  
passing through a limited communication zone- supports  
a variety of fixed equipment configurations. It  
supports configurations where usually one fixed  
equipment communicates with one mobile equipment, as  
well as handles exceptional situations where one fixed  
equipment can communicate with several mobile  
equipments,- defines data flow control procedures,-  
defines error control procedures,- defines  
unacknowledged connectionless services based on  
[ISO/IEC 8802-2] and provided to the application layer.

TITLE : Road traffic and transport telematics - Automatic  
dynamic debiting systems and automatic access control  
systems using dedicated short-range communication at  
5,8 GHz - Part 3: Application Layer Service Elements

TITLE AMPLIF.: The standards UNI 10607-1, UNI 10607-2, UNI 10607-3 and  
UNI 10607-4 form together a three-layered architecture  
for DSRC as used for EFC. This part of UNI  
10607:defines the common Application Service Elements  
(ASE) that are used by Application Service Objects  
(ASOs) for Application Processes in the EFC. This Part  
uses services provided by the Data Link Layer,  
[UNI10607-2], and covers all needed functionalities of  
intermediate layers of the OSI Basic Reference Model  
[ISO/IEC 7498-1], as these layers are not present in  
DSRC standards.

NATIONAL REF.: 08700942

TITLE : State of railway vehicles - Superstructure and special  
equipment of vehicles - Part 3: Steps, handles, hand  
rails, ladders, railings

TITLE AMPLIF.: This document determines the general requirements for  
the technical required state of steps, handles, hand  
rails, ladders, railings, walkways, XXX, stairs,  
signalbrackets, signs, rope hooks and rope eyes on  
railway vehicles.

TITLE : Cable accessories. Isolated connectors for use on  
underground distribution cables for rated voltage 0,6/1  
kV.  
TITLE AMPLIF.: This standard defines the designation, the  
manufacturing requirements (dimensions, materials,  
marking, etc.) and the tests to be comply by isolated  
connectors (straight-joints, branch-joints and  
terminations) for cables of rated voltage 0,6/1 kV used  
in underground power distribution systems, mainly for  
public distribution, with aluminium conductors in  
accordance with Spanish particular sections of HD 603  
and UNE 211603.

NATIONAL REF.: 164496599  
TITLE : Unregulated professional activities - Professions in  
the ICT domain - Definition of requirements for  
knowledge, ability and competence  
TITLE AMPLIF.: The standardization activity intends to define the  
general criteria for professionals active in the ICT  
domain, establishing the fundamental requirements for  
the set of knowledge, abilities and competences that  
characterize them. The project addresses the professions  
in the ICT domain, regardless of the working methods  
and contractual issues. The envisaged standard will  
adopt the European reference framework, competencies  
definitions and related skills "e Competence Framework  
2.0" and its future developments, adapting it , where  
appropriate, to the national context.
